

ENVIRONMENTAL POLICY YEAR 2023

Mirage SpA is a renowned leader in high-quality sunglasses and optical frames production.

Mirage SpA assumes, as an essential principle for all internal and external stakeholders, compliance with the laws and regulations in force in Italy and in all the countries in which it operates and undertakes to meet its compliance obligations. Aware of the primary collective interest of safeguarding the environmental and social context, it pursues development objectives, improving its environmental performance. In this regard, we develop lines of sunglasses and optical frames produced with selected sustainable materials and created through responsible production processes.

Mirage SpA places environmental protection as an integral part of its business and growth process, evaluating the impact of its activities and products, with the aim of managing them through a preventive approach: the criteria used are the implementation of an Environmental Management System according to the UNI EN ISO 14001 standard, which we will certify by March 2023, and the Environmental Product Analysis for a specific item of the 23° Eyewear line.

Mirage SpA develops projects and invests in new technologies, equipment and materials, giving strong emphasis to ecological products (sustainable and recycled materials). In the first quarter of 2023, a new handmade with acetate production line will be launched; Mirage SpA aims to obtain ISCC Plus certification by the end of May 2023 in order to be able to use the circular resin known as Acetate Renew by Mazzucchelli.

Mirage SpA promotes the use of the best technologies possible and an efficient use of natural resources, with particular attention to the rational management of water and energy resources. Over the years it has introduced injection molding with electric equipment, purchased 4.0 production technologies, tumbling machinery with water recirculation system, mold cooling with reduced use of energy, compressed air with inverter, lighting with LED lights, photovoltaic system, electric means of transportation and purchases energy produced 100% from renewable sources.

Mirage SpA is constantly looking for Partners and Clients who share these values.

Mirage SpA is constantly engaged in the process of continuous improvement of its Environmental Management System to increase environmental performance.
